**Subject:** WV

Luis – I put together this write-up for WV's EOY report. Please let me know if you have any comments/additions/etc.

Thanks.

WVDEP continues to contribute to the overall progress of the corrective action program. EPA would like to again acknowledge and thank WVDEP for the improved coordination between EPA and WVDEP's permitting and corrective sections. The quarterly calls, along with the monitoring and tracking documents, continue to serve as valuable mechanisms to ensure progress in meeting corrective action goals.

In FY13, WVDEP had one construction complete (CC) commitment and completed a partial CC for Union Carbide Corporation (Building 82). Another CC is on track for completion in early FY14 (Koppers Green Spring). In addition, a remedy selection (complete with controls) was made for Bayer MaterialScience. WVDEP committed to 3 human health (HH) environmental indicators (EIs) and completed 2 in FY13 (Chemical Leaman and ABL). The remaining HH EI commitment, Huntington Alloy, is awaiting additional sampling before a HH EI determination can be made. WVDEP committed and completed its 1 groundwater EI (ABL) in FY13. In addition, WVDEP completed their 2 EI site visit commitments (GW and HH EI for ABL). EPA would also like to acknowledge WVDEP's assistance on completing 3 very old remedies (Constellium Rolled Products, Miller Springs Remediation Management, and St. Mary's Refining Company) in FY13.
